

Blackbaud Development Program

ABOUT THE ROLE

Join our Early Career Development Program and kickstart your career in building innovative software solutions that make a real impact. You'll work alongside experienced engineers, learn best practices, and contribute to projects that matter—all while growing your technical and professional skills.

The **Blackbaud Development Program (BDP)** is an immersive early-career experience designed to accelerate your growth as a technology professional while contributing to solutions that matter. As part of this program, you'll join a cohort of passionate engineers and gain exposure to cutting-edge technologies, mentorship, and structured learning opportunities—all while growing your technical and professional skills.

WHAT YOU'LL DO

- Collaborate with cross-functional teams to design, develop, and test software applications.
- Write clean, maintainable, and efficient code under the guidance of senior engineers.
- Participate in code reviews and learn industry best practices.
- Assist in troubleshooting, debugging, and improving existing software.
- Engage in continuous learning through mentorship and structured development activities.

WHAT WE'RE LOOKING FOR

- **Education:** Bachelor's degree in Computer Science, Software Engineering, or related field (graduating in 2026).
- **Technical Skills:**
 - Familiarity with one or more programming languages (e.g., Java, C#, Python, or JavaScript).
 - Basic understanding of software development principles, data structures, and algorithms.
 - Exposure to web technologies, APIs, or cloud platforms is a plus.
- **Soft Skills:**
 - Strong problem-solving and analytical skills.
 - Ability to work collaboratively in a team environment.
 - Eagerness to learn and adapt in a fast-paced setting.
- **Additional Requirements:**
 - Available to start full-time in **June 2026**.
 - Authorization to work in Hyderabad, India.
